NEW Tack Room Doors

The Tack Room Door is perfect for feed or tack rooms and names can be changed or added to accommodate one or both rooms. This door arrives 4'3-1/2" wide x 8'0" height for sliding applications or 3'0" wide x 6'8" height for hinged door installation. The saddle silhouette or jumping horse are shown, but many other designs are available. Tack Room Doors are completely assembled, no lumber to cut! All the necessary fasteners for installation into lumber and hardware is included. Sliding doors arrive complete with one self-cleaning galvanized overhead round 8'0" track, two ball bearing trolleys, two custom aluminum stops, one zinc plated Super latch, latch receiver plates, one neoprene adjustable stay roller and detailed installation instructions. Hinged doors arrive with three zinc plated Stanley Tee Hinges and one slide bolt latch.

Heavy gauge non-rusting ALUMINUM is used throughout the hinged or sliding door structure, except where lumber is shown. Sliding doors include a full height 8'0" vertical, square tubing on both sides of door are added for rigidity and strength and reinforced header channels. Hinged and sliding doors both use aluminum of at least 1/8" quality thickness, no thin 1/16" material is used in the construction of this door and concealed weldments are throughout door structure for the cleanest looking appearance in the stall manufacturing industry. The lumber panels are surrounded and protected on all four edges of lumber insert by channeling. Periodic maintenance, such as painting or staining is recommended. All screw placements are counter sunk for a scratch free stall front wall.

This uniquely crafted sliding tack room door is manufactured to fit over your 4'0" wide by 8'1-1/2" high door opening and a 7-1/2" header above your 8'0" opening is necessary for the track to mount. Custom Sizes Available.
